PREFACE.

Encouraged by the liberal patronage with which our customers and the commercial public have favored us for many years, and in order to meet the increased demand for new, stylish and convenient desks of the present trade, we beg to present herewith this new edition, which contains additional new styles, also different improvements on the old.

It would make this pamphlet too large to describe and copy all the different styles of

Large and Small Sitting, Office, Standing, Parlor and Ladies' Desks, Secretary, Dwarf, Library and Wing Cases, Office and Library Tables,

manufactured by us, and therefore this book contains only the most stylish and saleable goods.

We therefore, would like to inform the public herewith, that we are prepared by every facility for manufacturing, to supply the trade with furniture made according to plans, dimensions and description furnished to us, as we have been doing before, for parties favoring us with their orders, to their entire satisfaction, not only in regard to workmanship and durability, but also in finish, general appearance of the articles and terms.

Having always a large stock of lumber on hand, which, before the same is used, undergoes the proper process of seasoning in our large steam drying room, and aided by the most improved machinery, we are enabled to furnish good furniture for a lower price, and in a shorter time than can be purchased elsewhere.

Soliciting your orders, which shall find our most prompt attention,

We remain,

Yours Respectfully,

April, 1876.
